||
|| **intro_F** florida intro
|| We will now ask you questions about the [state] elections for governor and senator that will be
|| held on November 2nd 2010. Many of the questions ask you to think about the percent chance
|| that something will happen in the future. The percent chance can be thought of as the number of
|| chances out of 100. You can use any number between 0 and 100. For example, numbers like: 2 and
|| 5 percent may be "almost no chance", 20 percent or so may mean "not much chance", a 45 or 55
|| percent chance may be a "pretty even chance", 80 percent or so may mean a "very good chance",
|| and a 95 or 98 percent chance may be "almost certain"
||
|| IF random order = 1 THEN
