**core\_intro** core intro

The following questions ask your opinions about flu and flu vaccines.

**C5\_vaccinated** have you had flu vaccination

Have you already had a flu vaccination this season (since the beginning of August 2010)?

1 Yes

2 No

IF have you had flu vaccination = No THEN

**percent\_chance\_intro** percent chance intro

Now we will ask you some questions about future behaviors and uncertain outcomes. In each case, try to think about the whole range of possibilities and think about how likely they are to occur. In these questions, we will ask you about the percent chance of something happening. The percent chance must be a number from 0 to 100. You can also give numbers after the decimal point (such as 1.1).

Here are some descriptions corresponding to different chances of something happening:

Absolutely will not happen = 0% chance    A very small  
chance = Less than 1% chance    A small chance = 2 to 15% chance

A reasonable chance = 15 to 40% chance    A pretty  
even chance = 40 to 60% chance    A big chance = 60 to 85% chance

A very big chance = 85 to 98% chance    Almost  
certain = More than 99% chance    Absolutely certain = 100% chance You can  
also think of percent chance as the number of times something happens out of 100.
