

## Well Being 211

**intro\_returningshort** intro survey if answered short survey

We hope that summer treated you to some nice, relaxing moments! It is September and time for our next monthly survey. By tracking the health, economic well-being and outlook of households like yours we can learn how problems in the economy are affecting all of us. Whether the changes in your household are large or small, the information you provide is invaluable. As always, thank you for your thoughtfulness and effort when answering our surveys and for your continued participation!

**intro\_returningshort2** intro 2 survey if answered short survey previously

Some of the monthly surveys are short (like the one in August) and some are long (like the survey in July). The survey for this month is one of the shorter ones. Some questions ask what has happened since a certain date which was when we last asked you these questions. You will receive \$8 for completing the survey. We understand that some of the questions are of a personal nature. Please remember that your answers are extremely important to us. Your participation is voluntary and you may skip over any questions that you would prefer not to answer. Your responses are confidential, and it helps us a great deal if you respond as completely, honestly and accurately as possible. Thank you for your participation!

| **E010** intro bins and balls gas prices

| We are interested in how well you think the economy will do in the future. In the next question we will ask you about gasoline prices and how much higher or lower you expect them to be one year from now. Of course this is not easy to forecast. People will have different opinions about this and some may be uncertain. For example, someone may think that gasoline prices will go up somewhere between 0% and 10%, but may also think there is some chance that gasoline prices will fall. We have designed a method for you to express this kind of uncertainty. We will show you an example on the next screen.

| **E012a** First bins and balls example

| Example: Expectations about changes in gasoline prices one year from now This picture illustrates this uncertainty about the one-year change in gasoline prices. Each of the six bins represents a range of price changes. The number of balls in a bin shows the likelihood of the actual price change. No ball in a bin means no chance, and a large number of balls means a large chance. This person put 14 balls (out of 20) in the bin 0% to 10% because s/he thinks it most likely gasoline prices will go up between 0 and 10%. There are 6 balls in the bin -10% to 0% because s/he thinks there is a smaller chance that prices could go down by 0% to 10%. There are no balls in the other bins showing there is no chance prices could go up by more than 10% or down by more than 10%. Of course the chances that you have in mind may be completely different. Now it's your turn!

| **E013** Gasoline price bins and balls

| Please put the 20 balls in the 6 bins to reflect your expectations about one-year changes in gasoline prices. The more likely you think that the change will be in a range represented by one of the bins, the more balls you should put in that bin. To move balls into a bin, click on the + and - buttons under each bin. You can also "drag and drop" the balls with your mouse.

| String

| IF Gasoline price bins and balls = empty THEN

|| **E013\_bin\_none** E013 no balls

|| You did not allocate any balls on the previous screen. If this is due to the dragging and dropping of the balls not working properly then please go back and try to use the plus or minus buttons below each bin (if you have not done so already). Alternatively, you can answer the question in a different format.

|| 1 Answer the question in a different format

|| IF ( E013 no balls = Answer the question in a different format ) THEN

||| **G040** Gasoline price higher in one year

||| What about your expectations about gasoline prices? On a scale from 0 percent to 100 percent where "0" means that you think there is absolutely no chance, and "100" means that you think the

```

|
| E010 intro bins and balls gas prices
| We are interested in how well you think the economy will do in the future. In the next question we
| will ask you about gasoline prices and how much higher or lower you expect them to be one year from
| now. Of course this is not easy to forecast. People will have different opinions about this and
| some may be uncertain. For example, someone may think that gasoline prices will go up somewhere
| between 0% and 10%, but may also think there is some chance that gasoline prices will fall. We
| have designed a method for you to express this kind of uncertainty. We will show you an example on
| the next screen.
|
| E012a First bins and balls example
| Example: Expectations about changes in gasoline prices one year from now This picture
| illustrates this uncertainty about the one-year change in gasoline prices. Each of the six bins
| represents a range of price changes. The number of balls in a bin shows the likelihood of the actual
| price change. No ball in a bin means no chance, and a large number of balls means a large chance.
| This person put 14 balls (out of 20) in the bin 0% to 10% because s/he thinks it most likely gasoline
| prices will go up between 0 and 10%. There are 6 balls in the bin -10% to 0% because s/he thinks
| there is a smaller chance that prices could go down by 0% to 10%. There are no balls in the other
| bins showing there is no chance prices could go up by more than 10% or down by more than 10%. Of
| course the chances that you have in mind may be completely different. Now it's your turn!
|
| E013 Gasoline price bins and balls
| Please put the 20 balls in the 6 bins to reflect your expectations about one-year changes in gasoline
| prices. The more likely you think that the change will be in a range represented by one of the
| bins, the more balls you should put in that bin. To move balls into a bin, click on the + and -
| buttons under each bin. You can also "drag and drop" the balls with your mouse.
| String
|
| IF ( Gasoline price bins and balls != empty AND !checkBins( Gasoline price bins and balls , 20 ))

### **BIntroShort** intro to spending questions

The next questions are about how much your household spent on certain items in the last calendar month (i.e. during the month of [holder for previous month name]). As you will see, the list does not cover all types of spending, only those that tend to be most frequent. In later surveys we will ask about additional types of spending, and you will have a chance to report about those less frequently purchased items. [ (Click here for a list of spending categories that we DO NOT ask about in this survey.) (Click here for a list of spending categories that we ask about LATER IN THIS survey.)] Please provide your best estimate of how much in total your household spent in the described categories. Please include spending by all members of your household, that is, by you and anyone living with you. Even if the amount your household spent last calendar month was unusual, please report that amount.
