|| WELCOME BACK TO OUR MONTHLY SURVEYS ON HEALTH AND ECONOMIC WELL-BEING! Beginning in November 2008

|| we have been surveying people about their health and economic well-being and how they have been faring in these economically difficult times. This questionnaire is part of our study. We will ask you questions related to your health, your household's financial well-being and your outlook for the future. By tracking the health, economic well-being and outlook of households like yours we can learn how problems in the economy are affecting all of us. Whether the changes in your household are large or small, the information you provide is invaluable. [Thank you for participating in the [New question] survey!] We greatly value your input on these topics and hope that you will find this questionnaire interesting. Thank you for your thoughtfulness and effort when answering our surveys and for your continued participation.

```

```

| E010 intro bins and balls gas prices

```

```

| We are interested in how well you think the economy will do in the future. In the next question we will
| ask you about gasoline prices and how much higher or lower you expect them to be one year from now.
| Of course this is not easy to forecast. People will have different opinions about this and some may be
| uncertain. For example, someone may think that gasoline prices will go up somewhere between 0% and
| 10%, but may also think there is some chance that gasoline prices will fall. We have designed a
| method for you to express this kind of uncertainty. We will show you an example on the next screen.

```

```

| E012a First bins and balls example

```

```

| Example: Expectations about changes in gasoline prices one year from now This picture
| illustrates this uncertainty about the one-year change in gasoline prices. Each of the six bins
| represents a range of price changes. The number of balls in a bin shows the likelihood of the actual
| price change. No ball in a bin means no chance, and a large number of balls means a large chance.
| This person put 14 balls (out of 20) in the bin 0% to 10% because s/he thinks it most likely gasoline
| prices will go up between 0 and 10%. There are 6 balls in the bin -10% to 0% because s/he thinks there
| is a smaller chance that prices could go down by 0% to 10%. There are no balls in the other bins
| showing there is no chance prices could go up by more than 10% or down by more than 10%. Of course
| the chances that you have in mind may be completely different. Now it's your turn!

```

```

| E013 Gasoline price bins and balls

```

```

| Please put the 20 balls in the 6 bins to reflect your expectations about one-year changes in gasoline
| prices. The more likely you think that the change will be in a range represented by one of the bins,
| the more balls you should put in that bin. To move balls into a bin, click on the + and - buttons
| under each bin. You can also "drag and drop" the balls with your mouse.

|||
||| E010 intro bins and balls gas prices
||| We are interested in how well you think the economy will do in the future. In the next question we
||| will ask you about gasoline prices and how much higher or lower you expect them to be one year from
||| now. Of course this is not easy to forecast. People will have different opinions about this and
||| some may be uncertain. For example, someone may think that gasoline prices will go up somewhere
||| between 0% and 10%, but may also think there is some chance that gasoline prices will fall. We
||| have designed a method for you to express this kind of uncertainty. We will show you an example on
||| the next screen.
|||
||| E012a First bins and balls example
||| Example: Expectations about changes in gasoline prices one year from now This picture
||| illustrates this uncertainty about the one-year change in gasoline prices. Each of the six bins
||| represents a range of price changes. The number of balls in a bin shows the likelihood of the actual
||| price change. No ball in a bin means no chance, and a large number of balls means a large chance.
||| This person put 14 balls (out of 20) in the bin 0% to 10% because s/he thinks it most likely gasoline
||| prices will go up between 0 and 10%. There are 6 balls in the bin -10% to 0% because s/he thinks
||| there is a smaller chance that prices could go down by 0% to 10%. There are no balls in the other
||| bins showing there is no chance prices could go up by more than 10% or down by more than 10%. Of
||| course the chances that you have in mind may be completely different. Now it's your turn!
|||
||| E013 Gasoline price bins and balls
||| Please put the 20 balls in the 6 bins to reflect your expectations about one-year changes in gasoline
||| prices. The more likely you think that the change will be in a range represented by one of the
||| bins, the more balls you should put in that bin. To move balls into a bin, click on the + and -
||| buttons under each bin. You can also "drag and drop" the balls with your mouse.
||| String
|||
||| IF ( Gasoline price bins and balls != empty AND !checkBins( Gasoline price bins and balls , 20 )) THEN

```
