**FLM\_6\_1** division test

The next part of the questionnaire is more like a quiz. The questions are not designed to trick you, so if you think you have the right answer, you probably do. If you don't know the answer, just skip the question by clicking "Next" until you get to the next question, or click "Don't know."

Imagine that 5 brothers are given a gift of \$1,000. If the brothers have to share the money equally how much does each one get?

String

**FLM\_6\_2** inflation test

Now imagine that the brothers have to wait for one year to get their share of the \$1,000 and inflation stays at 2 percent. In one year's time will they be able to buy:

1 More with their share of the money than they could today

2 The same amount

3 Less than they could buy today

4 It depends on the type of things that they want to buy

9 Don't know

**FLM\_6\_3** loan interest test

Suppose you lend \$25 to a friend one evening and he gives you \$25 back the next day. How much interest has he paid on this loan?

String

**FLM\_6\_4** savings account interest test

Suppose you put \$100 into a savings account with a guaranteed interest rate of 2 percent per year. You don't make any further payments into this account and you don't withdraw any money. How much would be in the account at the end of the first year, once the interest payment is made?

String

**FLM\_6\_5** savings account interest test five years later  
...and how much would be in the account at the end of five years?

String

**FLM\_6\_6** true false high return is high risk

Please indicate whether you think the following statements are true or false: An investment with a high return is likely to be high risk. In other words, if someone offers you the chance to make a lot of money there is also a chance that you will lose a lot of money.

- 1 True
- 2 False
- 9 Don't know

**FLM\_6\_7** true false high inflation

High inflation means that the cost of living is increasing rapidly.

- 1 True
- 2 False
- 9 Don't know

**FLM\_6\_8** true false diversification

It is usually possible to reduce the risk of investing in the stock market by buying a wide range of stocks and shares. In other words, it is less likely that you will lose all of your money if you save it in more than one place.

- 1 True
- 2 False
- 9 Don't know

**FLM\_6\_10** interest 1 percent inflation 2 percent test

Imagine that the interest rate on your savings account was 1 percent per year and inflation was 2 percent per year. After 1 year, would you be able to buy more than, exactly the same as, or less than today with the money in this account?

- 1 More than today
- 2 Exactly the same as today
- 3 Less than today
- 9 Do not know

**FLM\_6\_11** single stock vs mutual fund test

Do you think that the following statement is true or false? "Buying a single company stock usually provides a safer return than a stock mutual fund."

- 1 True
- 2 False
- 9 Don't know

**CS\_001** HOW PLEASANT INTERVIEW

Could you tell us how interesting or uninteresting you found the questions in this interview?

- 1 Very interesting
- 2 Interesting
- 3 Neither interesting nor uninteresting
- 4 Uninteresting
- 5 Very uninteresting
