

Well Being 452

[The following questions are displayed as a table]

vwance vwance

We'd like to ask you to think about the upcoming presidential election in 2016. What is the percent chance that you will vote in the presidential election?

Range: 0.00..100.00

vwance_explanation vwance explanation

The percent chance can be thought of as the number of chances out of 100. You can use any number between 0 and 100. For example, numbers like 2 and 5 percent may be 'almost no chance', 20 percent or so may mean 'not much chance', a 45 or 55 percent chance may be a 'pretty even chance', 80 percent or so may mean a 'very good chance', and 95 or 98 percent chance may be 'almost certain'.

[End of table display]

[The following questions are displayed as a table]

whovote_intro whovote_intro

If you do vote in the election, what is the percent chance that you will vote for a Democrat? And for a Republican? And for someone else? Please provide percent chances in the table below:

whovote_democrat whovote_democrat

Democrat

Range: 0.0..100.0

whovote_republican whovote_republican

Republican

Range: 0.0..100.0

whovote_someoneelse whovote_someoneelse

Someone else

Range: 0.0..100.0

whovote_total whovote_total
