

Well Being 502

intro2 intro

Thank you for participating in this survey. This survey is the fourth in a series of surveys that you will be asked to complete as part of the ALP FluPaths Study. You completed the first FluPaths survey in Fall 2016. For the next two and a half years, you will be asked to complete a survey about twice a year on your thoughts and experiences regarding influenza (flu) and influenza vaccination to help us better understand how your thinking about flu changes over time. Your responses are very important to us, as is your willingness to continue to regularly complete the FluPaths surveys. We are only interested in your perspective – there are no right or wrong answers to any of these questions. If you are uncertain about the answer to a question, please just give your best estimate. Please click "Next" to continue.
