instructions Oral Comprehension

Instructions for Rating Your Abilities In this survey, you will be asked to rate your level of functioning for a series of different abilities. When giving your rating, please rate your current level of ability, not what you were able to do in the past or what you could do in the future with

additional training. If you use an assistive device (e.g., glasses), please rate your ability when using the assistive device. First you will be shown the name and definition of an ability. Please read the definition carefully. For example: Arm-Hand Steadiness The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position. You will then be asked to rate your level of ability on a scale from 1 to 7, where 1 is the lowest possible level and 7 is the highest possible level. If you cannot do any level of the ability, please select that response below the numeric scale. To help you understand what we mean by level, we provide you with examples of tasks or activities at different levels for each ability. The examples are meant to help you find your own rating within the scale; do not focus on whether you perform the specific activity, which may come from an unfamiliar context. For example: Please rate your level of ARM-HAND STEADINESS by clicking the circled number that best matches your level of ability. If you cannot do any level of the ability, please select the response below the number scale instead of clicking a circled number.
