

(MS525) GM CROPS AND VACCINES – 2ND FOLLOW UP [WAVE 2]

CONDITION	true	false
	Question VACCINES()	Question GM()

vac_w2_newinf

[Not required]

A vaccine imitates an infection without inducing the disease, and leads the immune system to develop immunity to that disease.

In the following questions, we will ask you about vaccines currently recommended for children (childhood vaccines), such as the measles, mumps, rubella (MMR) vaccine or the tetanus, diphtheria, and pertussis (Tdap) vaccine.

Since the last survey, have you heard or read anything about childhood vaccines?

- Yes (1)
- No (2)

CONDITION	true	false
	Question vac_w2_newsresource()	

vac_w2_newsresource

[Randomized answerlist]

Please select the sources which provided you any information about childhood vaccines since the last survey.

You can select more than one source.

- US scientists (1)
- Your online community (Facebook groups, Reddit communities, discussion boards, etc.) (2)
- Online experts and influencers you follow (on blogs, Twitter, Instagram, etc.) (3)
- Your family and close friends (4)
- Representatives of governmental agencies (5)
- News reports from journalists (6)
- US public opinion polls (7)
- Medical doctors (8)

Scientists have added genes to certain food crops to make them insect resistant and herbicide tolerant. These are called genetically modified (GM) crops. Examples of GM crops in the U.S. include some corn, soybeans, and canola.

In the following questions, we will ask you about these GM crops and GM food made from these crops.

Since the last survey, have you heard or read anything about GM food?

- Yes (1)
- No (2)
