

(MS538) COVID-19 SURVEY [WAVE 2]

intro

Thank you for participating in this survey. It is the second in a series of surveys that you will be asked to complete, focused on the current coronavirus (COVID-19) pandemic. Each of these surveys will be conducted on the ALP. Every two or three weeks for the next few months, we are asking you to complete short surveys about your thoughts and experiences regarding the coronavirus to help us better understand your thinking about how it changes over time. Your responses are very important to us, as is your willingness to continue to regularly complete these surveys. We are only interested in your perspective – there are no right or wrong answers to any of these questions. If you are uncertain about the answer to a question, please give your best estimate.

The first several questions ask you to list things you know or think are true about the coronavirus (COVID-19).

PercentChanceIntro

Several of the following questions will ask you about the percent chance of something happening. The percent chance must be a number from 0 to 100. Here are some descriptions corresponding to different chances of something happening:

- Absolutely will not happen= 0% chance
- A very small chance= Less than 1% chance
- A small chance= 2 to 15% chance
- A reasonable chance= 15 to 40% chance
- A pretty even chance= 40 to 60% chance
- A big chance= 60 to 85% chance
- A very big chance= 85 to 98% chance
- Almost certain= More than 99% chance
- Absolutely certain= 100% chance

You can also think of percent chance as the number of times something happens out of 100.
