

(MS540) FLUPATHS [W08, PART 1 OF 2]

introduction

Thank you for participating in this survey. This survey represents the eighth and final survey in a series of surveys that you have been asked to complete as part of the ALP FluPaths Study. You completed the first FluPaths survey in Fall 2016. You have been asked to complete a survey twice a year on your thoughts and experiences regarding influenza (flu) and influenza vaccination to help us better understand how your thinking about flu changes over time.

This survey will work a bit differently than past FluPaths surveys. First, because this survey takes place during the ongoing coronavirus (COVID-19) pandemic, we will also ask about your thoughts and experiences regarding the coronavirus. Second, we will be splitting up the survey into two parts, with the second half fielded two weeks from now. Your responses are very important to us, so please complete both halves (this one and the one in two weeks). We are grateful that you have participated across the four years!

We are only interested in your perspective – there are no right or wrong answers to any of these questions. If you are uncertain about the answer to a question, please just give your best estimate. Please click “Next” to continue.
