e1a_block1_q1

[Not required]

This year, your state government is considering a new program to help members of your community. There are two programs proposed. Both programs would provide housing, employment, and/or drug treatment for people in need. A program would cost your household \$100 or \$200 in taxes per year.

Program features highlighted in yellow differ. Those in white are the same. Assume each program helps roughly the same number of people.

| | Program A | Program B |
|---------------------------------|-----------|-----------|
| Housing assistance | Yes | No |
| Job assistance | Yes | No |

Question e2_block1_q1()

e2_block1_q1

[Not required]

There is discussion about an annual benefit bonus for military veterans. The annual bonus would depend on: when the veteran served in the military, whether they have a physical disability from their military service (for example, chronic back pain or an amputation), and whether they have a mental health disability from their military service (for example, PTSD). The bonus for veterans could cost your household \$20, \$50, or \$100 in taxes per year.

Bonus features that are highlighted in yellow differ. Those in white are the same. Please assume veterans' benefits are the same in all other ways, including those not listed.

There is discussion about an annual benefit bonus for military veterans. The annual bonus would depend on: when the veteran served in the military, whether they have a physical disability from their military service (for example, chronic back pain or an amputation), and whether they have a mental health disability from their military service (for example, PTSD). The bonus for veterans could cost your household \$20, \$50, or \$100 in taxes per year.

Bonus features that are highlighted in yellow differ. Those in white are the same. Please assume veterans' benefits are the same in all other ways, including those not listed.
