For the next two questions, think about aspects of your life in older adulthood (60s, 70s, 80s, 90s+) – things like where you live, who you live with, and how you spend your time. If you don't consider yourself to be an older adult yet, think about the older adulthood you want in your future.

In older adulthood, what is your ideal balance between your safety and your autonomy (freedom to make your own decisions)?

My safety, even if my autonomy is at risk... My autonomy, even if my safety is at risk
