

# (MS611) FLU+COVIDPATHS [W4] [FLUPATHS W12]

## Survey\_intro

Thank you for participating in this survey. It is the fourth in a series of surveys that you will be asked to complete, and are all part of the ALP Flu+COVIDPaths Study. Each of these surveys will be conducted on the ALP and labeled as part of FluPaths or COVIDPaths (or both). You will also notice the Flu+COVIDPaths logo on the surveys and in invitation emails, alongside the normal ALP logo.

Specifically, at least twice a year for the next two years, you will be asked to complete surveys about your thoughts and experiences regarding influenza (flu) and COVID-19, as well as vaccinations for each. This will help us better understand how your thinking about flu and COVID-19 changes over time. Your responses are very important to us, as is your willingness to continue to regularly complete the Flu+COVIDPaths surveys.

We are only interested in your perspective – there are no right or wrong answers to any of these questions. If you are uncertain about the answer to a question, please give your best estimate.

Today's survey will be in two parts. The first part focuses on you specifically. The second part will ask you about people who you interact with on a day-to-day basis, and what you know of their experiences with flu and/or COVID-19.

Please click ">>" to continue.

## Section2\_intro

The following questions ask about your experiences with the flu, which typically comes on suddenly and causes fever, cough, and sore throat. It may also include muscle or body aches and headaches. Typically, people catch the flu between the months of September and March.

## VaccinatedFluThisYear

Given what you just said, how uncertain do you feel about this trend over the next 6 months?

- Highly uncertain (1)
- Moderately uncertain (2)
- A bit uncertain (3)
- Not at all uncertain (4)

## DescriptiveCOVIDNorm -

[Numeric ♦ Not required ♦ Lower limit=0 ♦ Lower limit type=GreaterOrEqual ♦ Upper limit=100000 ♦ Upper limit type=SmallerOrEqual ♦ Total Digits=28 ♦ Decimal places=1]

Consider 100,000 adults in the state where you live. How many of them do you think have caught COVID-19 in the last month?

*Either use the scale or type your answer in the box below. (If you type in your answer, do not use non-numeric characters like %.)*

## ALTER\_intro

The next section of the survey asks about members of your social network and their experiences. Specifically, we are asking about the experiences of people you know to help us better understand how people interact about flu and COVID-19 and how this changes over time. Your responses are very important to us, as is your willingness to complete future surveys.

We are only interested in your perspective – there are no right or wrong answers to any of these questions. If you are uncertain about the answer to a question, please give your best estimate.

**ALTERACTIVE -**

In a prior survey, you listed people with whom you discussed matters important to you. The next set of questions is about this list of people. First, we want to make sure that each of these people should still be on your list or if you would like to remove any of them for any reason, such as if they have passed away. Please review the list below, and uncheck any people that should no longer be on the list of people we ask you about.

To help you recall these people, we have included their gender, age, and relationship to you. If you don't recognize a person, please uncheck the box. You'll have a chance to add new people to the list.
