Q20 Intro CHANCE THINGS HAPPEN INTRO
Now we would like you to think about the percent chance that different things
may happen to prices in general during the next 12 months. INSTRUCTIONS
The percent chance can be thought of as the number of chances out of 100. You
 can use any number between 0 and 100. For example, numbers like : 2 and 5
 percent may be "almost no chance", 20 percent or so may mean "not much
 chance", a 45 or 55 percent chance may be a "pretty even chance", 80 percent
 or so may mean a "very good chance", and a 95 or 98 percent chance may be
 "almost certain".
