C1b  MOST IMPORTANT REASON SIDE EFFECTS
Out of 100,000 people Possible Side Effects 14,000 dry mouth
7,000 constipation, headache 400 stomach upset 50 dizziness
1 muscle damage leading to a very serious condition called
rhabdomyolysis Which of the following reasons was most important to
your answer about how likely you are to take this drug? Please choose the
most important reason below.
1 Most of the side effects are not very serious.
2 Any serious side effects are very unlikely.
3 You have high cholesterol, but prefer to avoid taking medications, and will do
something else to lower your cholesterol.
4 There are too many possible side effects.
5 A lot of people will experience at least one of the side effects, and you don’t want
to be one of them.
6 The very serious muscle damage.
