Well Being 218

surveyintro survey intro
We are interested in the payments you make and the method you use to make them. In the following questions, we will ask you how often you make payments and how big these payments are for a number of payment methods. Specifically, we will ask you about payments made with cash, debit card, credit card, and personal check. We know it may be difficult to remember all of these payments, but please do your best. You may also consult your past bank statements, personal records, and other documentation to answer these questions. Let us start with []
