| | WELCOME BACK TO OUR SURVEYS ON HEALTH AND ECONOMIC WELL-BEING! Beginning in November
| | 2008 we have been surveying people about their health and economic well-being and how they have been
| | faring in these economically difficult times. This questionnaire is part of our study. We will
| | ask you questions related to your health, your household's financial well-being and your outlook
| | for the future. By tracking the health, economic well-being and outlook of households like yours
| | we can learn how problems in the economy are affecting all of us. Whether the changes in your
| | household are large or small, the information you provide is invaluable. [Thank you for
| | participating in the [New question] survey!] We greatly value your input on these topics and
| | hope that you will find this questionnaire interesting. You will receive $[reward survey] for
| | completing the survey. We understand that some of these questions are of a personal nature.
| | Please remember that your answers are extremely important to us. Your participation is voluntary
| | and you may skip over any questions that you would prefer not to answer. Your responses are
| | confidential, and it helps us a great deal if you respond as completely, honestly and accurately
| | as possible. Thank you for your continued participation!

IF Random balls and bins = Balls and bins AND Preload indicating whether respondent explicitly
chose to have probability questions in percent format = Respondent did not explicitly chose yet to
have probability questions in percent format THEN
|
| **E010** intro bins and balls gas prices
| We are interested in how well you think the economy will do in the future. In the next question we
| will ask you about gasoline prices and how much higher or lower you expect them to be one year
| from now. Of course this is not easy to forecast. People will have different opinions about
| this and some may be uncertain. For example, someone may think that gasoline prices will go up

| somewhere between 0% and 10%, but may also think there is some chance that gasoline prices will
| fall. We have designed a method for you to express this kind of uncertainty. We will show you
| an example on the next screen.
|
| **E012a** First bins and balls example
| Example: Expectations about changes in gasoline prices one year from now This picture
| illustrates this uncertainty about the one-year change in gasoline prices. Each of the six bins
| represents a range of price changes. The number of balls in a bin shows the likelihood of the
| actual price change. No ball in a bin means no chance, and a large number of balls means a large
| chance. This person put 14 balls (out of 20) in the bin 0% to 10% because s/he thinks it most
| likely gasoline prices will go up between 0 and 10%. There are 6 balls in the bin -10% to 0%
| because s/he thinks there is a smaller chance that prices could go down by 0% to 10%. There are
| no balls in the other bins showing there is no chance prices could go up by more than 10% or down
| by more than 10%. Of course the chances that you have in mind may be completely different. Now
| it's your turn!
|
| **E013** Gasoline price bins and balls
| Please put the 20 balls in the 6 bins to reflect your expectations about one-year changes in
| gasoline prices. The more likely you think that the change will be in a range represented by one
| of the bins, the more balls you should put in that bin. To move balls into a bin, click on the +
| and - buttons under each bin. You can also "drag and drop" the balls with your mouse.
| String
|
| IF Gasoline price bins and balls = empty THEN
| |
| | **E013_bin_none** E013 no balls
| | You did not allocate any balls on the previous screen. If this is due to the dragging and
| | dropping of the balls not working properly then please go back and try to use the plus or minus
| | buttons below each bin (if you have not done so already). Alternatively, you can answer the
| | question in a different format.
| | 1 Answer the question in a different format
| |
| | IF (E013 no balls = Answer the question in a different format) THEN
| | |
| | | **G040** Gasoline price higher in one year
| | | What about your expectations about gasoline prices? On a scale from 0 percent to 100
| | | percent where "0" means that you think there is absolutely no chance, and "100" means that you
| | | think the event is absolutely sure to happen, what are the chances that by next year at this
| | | time gasoline prices will be higher than they are today?
| | | Range: 0.0..100.0
| | |
| | | IF Gasoline price higher in one year = empty THEN
| | | |

| |
| | **E010** intro bins and balls gas prices
| | We are interested in how well you think the economy will do in the future. In the next question
| | we will ask you about gasoline prices and how much higher or lower you expect them to be one
| | year from now. Of course this is not easy to forecast. People will have different opinions
| | about this and some may be uncertain. For example, someone may think that gasoline prices
| | will go up somewhere between 0% and 10%, but may also think there is some chance that gasoline
| | prices will fall. We have designed a method for you to express this kind of uncertainty. We
| | will show you an example on the next screen.
| |
| | **E012a** First bins and balls example
| | Example: Expectations about changes in gasoline prices one year from now This picture
| | illustrates this uncertainty about the one-year change in gasoline prices. Each of the six bins
| | represents a range of price changes. The number of balls in a bin shows the likelihood of the
| | actual price change. No ball in a bin means no chance, and a large number of balls means a
| | large chance. This person put 14 balls (out of 20) in the bin 0% to 10% because s/he thinks it
| | most likely gasoline prices will go up between 0 and 10%. There are 6 balls in the bin -10% to
| | 0% because s/he thinks there is a smaller chance that prices could go down by 0% to 10%. There
| | are no balls in the other bins showing there is no chance prices could go up by more than 10% or
| | down by more than 10%. Of course the chances that you have in mind may be completely
| | different. Now it's your turn!
| |
| | **E013** Gasoline price bins and balls
| | Please put the 20 balls in the 6 bins to reflect your expectations about one-year changes in
| | gasoline prices. The more likely you think that the change will be in a range represented by
| | one of the bins, the more balls you should put in that bin. To move balls into a bin, click on
| | the + and - buttons under each bin. You can also "drag and drop" the balls with your mouse.
| | String
| |
| | IF (Gasoline price bins and balls != empty AND !checkBins(Gasoline price bins and balls , 20
| |)) THEN
| | |

EX001 unemployment rate higher one year from now
Thinking about the economy as a whole: On a scale from 0 to 100, what do you think are the chances that the national unemployment rate will be higher one year from now compared to today?
Range: 0.0..100.0

EX002 chances income will be higher over the next 12 months
In the next questions we will ask you how you think your[family] income will change over the next 12 months compared to today. One thing to keep in mind is that prices may change also over the next 12 months. So we will ask you about: the chances that your income will be higher the chances that prices will go up and the chances that your income will go up more than prices over the next 12 months. Let's start with your income: What are the chances that your[family] income will be higher one year from now than it is today?
Range: 0.0..100.0

EX003 chances prices will be higher one year from now
What are the chances that prices will be higher one year from now than they are today?
Range: 0.0..100.0

EX004 chances prices will be higher one year from now
What are the chances that your[family] income will go up more than prices will go up over the next year? (Note: If your income goes up by more than prices over the same period then you will be able to buy more with your income than you can buy today.)
Range: 0.0..100.0

Q1 BETTER OR WORSE OF THAN YEAR AGO
We are interested in how people are getting along financially these days. Would you say that you
are better off or worse off financially than you were a year ago?
1 Better off
2 About the same
3 Worse off

Q2 BETTER OR WORSE OF THAN YEAR FROM NOW
Now looking ahead - do you think that a year from now you will be better off financially, or worse
off, or just about the same as now?
1 Will be better off
2 About the same
3 Will be worse off

CS_001 HOW PLEASANT INTERVIEW
Could you tell us how interesting or uninteresting you found the questions in this interview?
1 Very interesting
2 Interesting
3 Neither interesting nor uninteresting
4 Uninteresting
5 Very uninteresting
