## Q1_intro Q1_intro

There will be a general election in your state in November, including an election for the member of the US House of Representatives from your district[FL_Q1senate], plus other state and local offices.[FL_Q1senate]special What is the percent chance that you will vote for the following [FL_Q1office] in the upcoming election? The percent chance can be thought of as the number of chances out of 100 . You can use any number between 0 and 100 . For example, numbers like 2 and 5 percent may be 'almost no chance', 20 percent or so may mean 'not much chance', a 45 or 55 percent chance may be a 'pretty even chance', 80 percent or so may mean a 'very good chance', and 95 or 98 percent chance may be 'almost certain'.
