CoronaVirusInfo - Corona Virus Info

In the following questions, please answer based on what you know and have heard about this year's novel coronavirus that was first identified in Wuhan, China (formally called COVID-19), hereafter referred to simply as "coronavirus".

The first two questions will ask you about the percent chance of something happening. The percent chance must be a number from 0 to 100. Here are some descriptions corresponding to different chances of something happening:

Absolutely will not happen= 0 % chance A very small chance= Less than 1% chance A small chance= 2 to 15 % chance
A reasonable chance= 15 to 40 % chance A pretty even chance= 40 to 60% chance A big chance= 60 to 85 % chance A very big chance= 85 to 98 % chance Almost certain= More than 99% chance Absolutely certain= 100% chance

You can also think of percent chance as the number of times something happens out of 100.
